## **DETAILED ACTION**

## Election/Restrictions

- 1. Restriction to one for following inventions is required under 35 U.S.C. 121:
- I. Claims 1-24 are drawn to invoking Object Oriented Message, classified in class 709, subclass 315.
- II. Claims 25- 32 are drawn to invoking task management control, classified in class 709, and subclass 100.
- III. Claims 33-39 are drawn to invoking automated electrical financial or business practice of management arrangement, classified in class 705, subclass 1+.

The inventions are distinct, each from the other because of the following reasons.

Invention I, II are III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instance case, invention I have separate utility such as dynamic linking without using load balancing, and invention II has separate utility such as load balancing without using dynamic linking. See MPEP 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, different searches and their recognized divergent subject matter, and the search required for group I is not required for group II or III restriction for examination purposes as indicated is proper.
